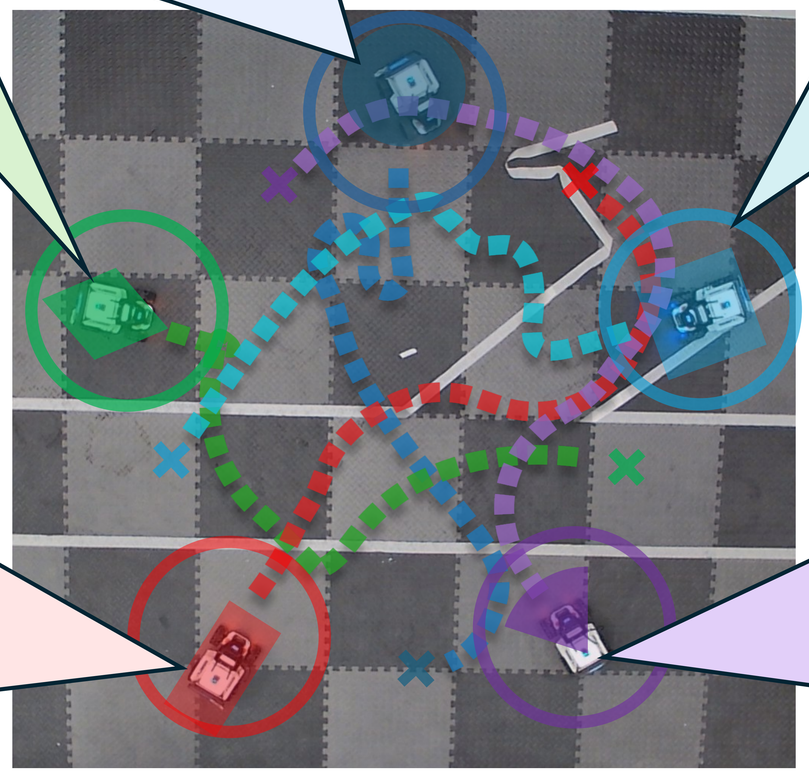
Unicycle (UNI)

I can freely combine speed and turning within limits. I will also take on some more responsibility.

Differential Drive (DD)

I trade speed for turning, but I can still rotate in place to go around if needed.



Double Integrator (DI)

I have the greatest flexibility in motion. I can take on more responsibility if needed.

Car-like (CL)

I need forward speed just to turn. I can go backward, but tight maneuvers are still difficult. Could you give me a little more room?

Forward-only Car (FO)

I can only move forward and need speed just to turn. My ability to maneuver out of the way is quite limited. Could you go around me instead?
